

# LightBox Lender Solutions

LightBox supports the top two lending due diligence and procurement systems in the industry. We service 1,200+ banks and 30,000+ appraisers – enabling them to work more effectively and more efficiently. More than \$90B in loans are processed through our platforms every year.

We understand that onboarding new technology is a big undertaking. Learn about our top four value drivers, so you can set yourself up for success with LightBox:

## Simplicity:

LightBox Lender platforms enhance vendor communication, enabling you to generate RFPs more easily, connect with loan origination systems seamlessly, and manage all vendors in one place.

## Efficiency:

Whether you choose Collateral360® or RIMS®, each system is designed to automate workflows, data collection, simplify bidding, reduce training and personnel costs, and streamline fragmented processes.

## Control:

LightBox Lender solutions are designed to meet the separation of lending and appraisal functions, and ease the preparation of regulatory audits with change logs and detailed reporting.

## Security:

As a company, LightBox continues to invest resources to ensure all platforms meet the highest security information standards.

Our products would be nowhere without the people behind them. LightBox has the best-in-class in-house resources to support your lending needs.

## Customer Success & Support:

Dedicated to understanding your challenges, providing solutions, and connecting you with other experts at LightBox to dive deeper into your needs and create efficiencies for you.

## Product Managers & Engineers:

Committed to responding to technical needs and translating your requests into product enhancements so that you can focus on the complexities of what you do, without worrying about your machines running.
